Large Scale Props Project

This module introduces the basic elements of model making, technical drawing, scene painting and costume construction and provides the student with the skills required to support the design process.

Assessment

The student is assessed on:

- A presentation of a record of their process
- The final physical artefact

On completion of the module the student should be able to:

- Demonstrate the ability to select, test and make appropriate use of materials, processes within a scenic workshop construction environment
- Demonstrate an understanding of the application of those skills in the context of practical creative work for design for performance and as a part of a team realising the design
- Develop outcomes, for example scenic and costume elements, both independently and collaboratively in response to set briefs for design for performance
